

Connect a Public Website as a Knowledge Source

Lab Duration: 10 Minutes

Lab Overview

In this lab, you will connect a **public website** to your Copilot Studio agent. Once connected, your copilot can answer user questions using information available on that website.

Business Scenario

Contoso wants its HR Copilot to answer employee questions using information available on the company's public HR website instead of manually creating topics.

Microsoft recommends adding a meaningful **Name** and **Description** for every knowledge source because it helps the AI select the correct source when generating responses. Public website knowledge uses **Grounding with Bing Search** to retrieve information from the specified website.

Learning Objectives

After completing this lab, you will be able to:

- Add a public website as a knowledge source
 - Configure website details
 - Test website-based responses
 - Understand website knowledge limitations
-

Website used in this lab

<https://learn.microsoft.com/en-gb/>

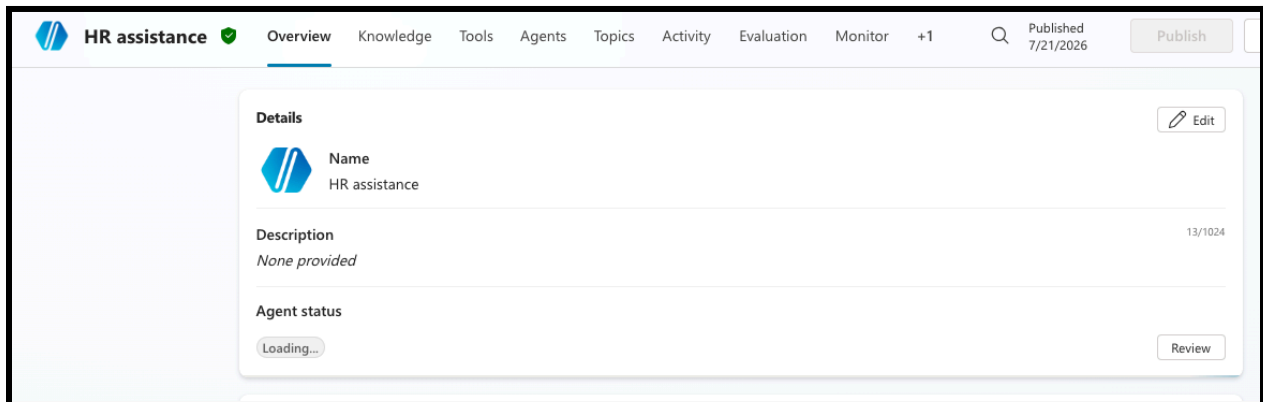

(You may use any public website of your choice.)

Lab Instructions -

Task 1 – Open Your Copilot

Step 1 - Open **Microsoft Copilot Studio**.

Step 2 - Open the existing agent created in the previous lab.

Task 2 – Add Website Knowledge

Step 1 - From the left navigation pane, select **Knowledge**

Step 2 - Click **+ Add Knowledge**

A list of available knowledge sources appears.

Step 3 - Select **Public websites**

Add knowledge

Help your agent provide more relevant information and insights. [Learn more](#)

Q Search for a knowledge source

Upload file

Drag and drop, or [select to browse](#), or upload and sync from

OneDrive

SharePoint

Helps your agent access knowledge from remote file locations. [Learn more](#)

Public websites

SharePoint

Azure AI Search

Dataverse

Dynamics 365

Salesforce

ServiceNow

Azure SQL

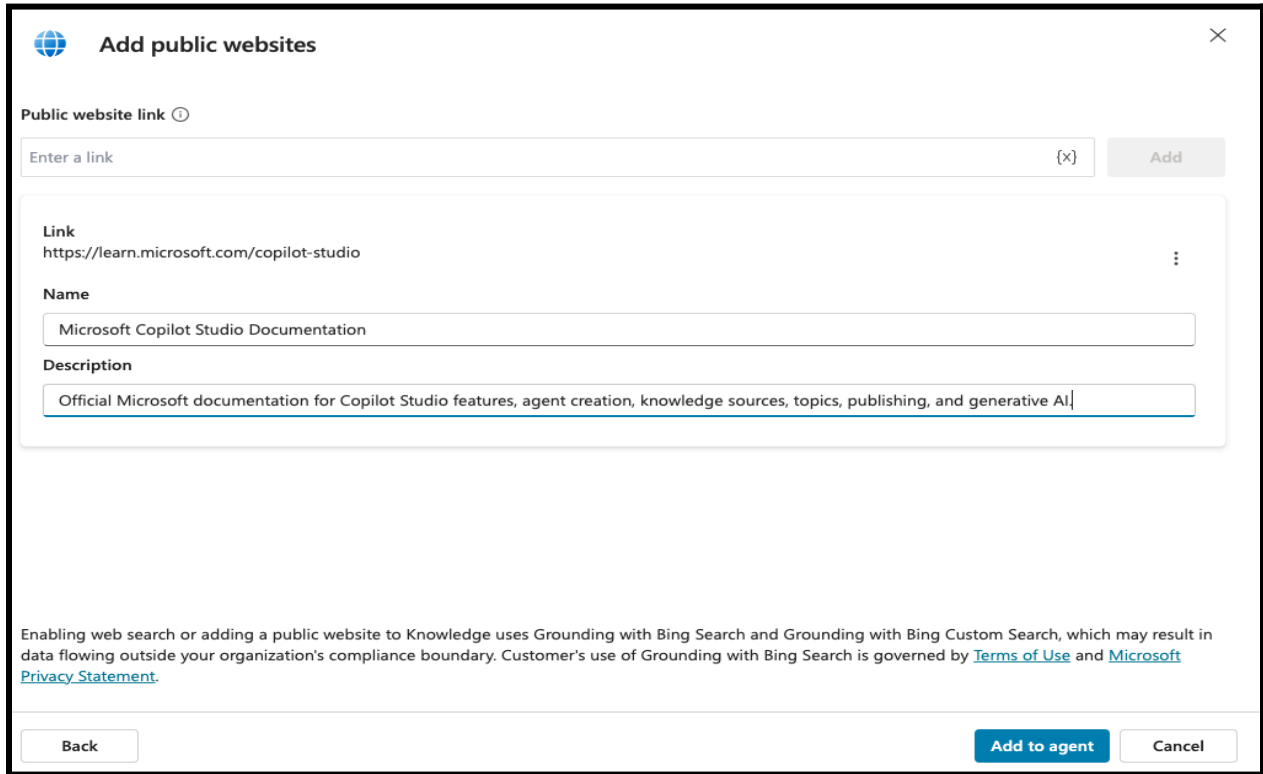

Task 3 – Configure the Website

Fill in the following details.

Field	Value
Website URL	https://learn.microsoft.com/en-gb/
Name	Microsoft Copilot Studio Documentation
Description	Official Microsoft documentation for Copilot Studio features, agent creation, knowledge sources, topics, publishing, and generative AI.

Click: **Add to agent**

Copilot Studio will save the website as a knowledge source. Microsoft recommends writing a detailed description because it improves generative orchestration and knowledge selection.

The screenshot shows a dialog box titled "Add public websites" with a globe icon and a close button. It contains a "Public website link" section with a text input field labeled "Enter a link" and a placeholder "{x}", followed by an "Add" button. Below this is a form for adding a new link, with fields for "Link" (containing "https://learn.microsoft.com/copilot-studio"), "Name" (containing "Microsoft Copilot Studio Documentation"), and "Description" (containing "Official Microsoft documentation for Copilot Studio features, agent creation, knowledge sources, topics, publishing, and generative AI"). At the bottom, there is a disclaimer about data flow and compliance, and three buttons: "Back", "Add to agent", and "Cancel".

Public website link ⓘ

Enter a link {x} Add

Link
https://learn.microsoft.com/copilot-studio

Name
Microsoft Copilot Studio Documentation

Description
Official Microsoft documentation for Copilot Studio features, agent creation, knowledge sources, topics, publishing, and generative AI

Enabling web search or adding a public website to Knowledge uses Grounding with Bing Search and Grounding with Bing Custom Search, which may result in data flowing outside your organization's compliance boundary. Customer's use of Grounding with Bing Search is governed by [Terms of Use](#) and [Microsoft Privacy Statement](#).

Back Add to agent Cancel

Task 4 – Verify the Knowledge Source

Navigate back to the **Knowledge** page. And, Verify that the website appears in the list.

You should see:

- Website Name
- URL
- Description
- Status

HR assistance Overview Knowledge Tools Agents Topics Activity Evaluation Monitor +1 Published 7/21/2026 Publish						
+ Add knowledge All Files Public website						
Name	Type	Available to	Usage	Last modified	Status	
Microsoft Copilot Studio Documen...	Public website	HR assi...	General	Foundry User1 27 seconds ago	Ready	
Sample_HR_Policy_Handbook_For_...	Files	HR assi...	General	Foundry User1 1 day ago	Ready	
SummitRealtyCaseStudy.docx	Files	HR assi...	General	Foundry User1 1 day ago	Ready	

Task 5 – Test the Copilot

Open the **Test your agent** pane.

Ask the following questions:

Question 1 - What is Microsoft Copilot Studio?

Question 2 - What knowledge sources are supported in Copilot Studio?

Observe that the responses are generated using information from the connected website.

Expected Result

Your Copilot should:

- Answer questions using the connected website.
- Generate responses based on website content.
- Cite information from the website when applicable.

Reference Instructions

Use the following Microsoft Learn articles for additional guidance on website knowledge sources:

1. Review how to add a public website as a knowledge source in Copilot Studio. This article explains URL configuration, naming, descriptions, and Grounding with Bing Search.
